BRIEF DESCRIPTION

- ◀ Family business since 1998
- ◀ 2 locations: Switzerland, and Slovenia
- ◀ Focus on ultrasound
- ◀ Produces applications for the medical and automotive industry
- ◀ Cleanroom production ISO 8
- ◀ Co-design of workpiece and process
- ◀ Integration of the ultrasonic systems in series production
- ◀ Peripheral products for ultrasonic technology and mechanical engineering
- ◀ Production: A and B samples, series, and contract manufacturing
- ◀ ISO 9001 since 2012,
IATF 16949 **in preparation*

FACTS

COMPANY GROWTH AND MODERNIZED CLEANROOM

In 2020, we built an ISO 8 cleanroom to perform a variety of ultrasonic applications. Due to the increase in production, we have modernized our existing cleanroom, creating more space for growth, specialized industrial products and new employees.

OVER 400 SUCCESSFUL PROJECTS IMPLEMENTED

We have already helped more than 400 customers to improve their projects and accordingly provide them with the high-quality, individual, and innovative solutions for their own production.

ENVIRONMENTAL PROTECTION AND CIRCULAR ECONOMY

Our goal is not only to put things together, but also to successfully take them apart so that they can be reused or recycled. That's why we put a lot of emphasis on circular economy and one way to join metals, for example, is with ultrasonic welding as a joining technique.

VIAL AUTOMATION COMBINES SLOVENIAN AND SWISS VALUES IN TERMS OF QUALITY AND FLEXIBILITY

Two locations, common values. VIAL Automation represents well-known plant manufacturers in Slovenia and, after 25 years, is a reliable partner to the manufacturing industry. In Switzerland, VIAL Automation offers contract manufacturing and series production in addition to industrial expertise.

WE ARE LOOKING FORWARD TO HEARING FROM YOU
